

Your Doctor has asked you to collect a semen specimen for Pathology.

Please follow the instructions from your surgeon.

Collect the specimen at least 3 days after your last ejaculation.

Collect the entire specimen by masturbation into the container.

Do not use condoms, artificial lubricants or talcs.

Write your full name, date of birth, and the date and time of collection on the container.

Close the lid on the container tightly.

Keep at room temperature and deliver to the Austin pathology collection centre at the Austin Hospital within 1 hour.
