## Austin Health Pathology - High-Risk Critical \& Significant Result Notifications

Alert thresholds apply to all new and/or unexplained results only, unless otherwise specified.
Level 1 CRITICAL RESULT (highlighted boxes): These results pose the highest clinical risk to the patient and require notification to occur within 1 hour.

Level 2 SIGNIFICANT RESULT: These results are high-risk and require notification for all inpatient/ED patients as soon as possible, and preferably within one hour. Notify outpatient results as soon as possible between 8am - 8pm; if outside of these hours, attempt to notify outpatient result if after hours contact details available, otherwise notify as soon as practical, i.e., the following morning when clinic opens.

PAEDIATRIC: defined as 16 years or younger.

Biochemistry and Immunology Alert Thresholds

| Analyte | Units | Low <br> Threshold | High Threshold | Comments |
| :---: | :---: | :---: | :---: | :---: |
| ALT | IU/L | - | >1000 | Critical result: notify immediately |
|  |  | - | >500 | If paediatric: notify all presentations |
| ANCA - MPO | IU/mL | - | $\geq 6$ |  |
| ANCA - PR3 | IU/mL | - | $\geq 5$ |  |
| Arterial carbon dioxide tension <br> (Blood gas, $\mathrm{pCO}_{2}$ ) | mmHg | - | >60 | Critical result (if laboratory performed): notify immediately |
| Arterial oxygen tension <br> (Blood gas, $\mathrm{pO}_{2}$ ) | mmHg | <55 | - | Critical result (if laboratory performed): notify immediately |
| Arterial/Capillary pH <br> (Blood gas) | mmHg | <7.30 | >7.60 |  |
|  |  | - | >1000 | Critical result: notify immediately |
|  |  | - | >500 | If paediatric: notify all presentations |
| Ammonia | umol/L | - | >100 | If paediatric: notify all presentations |
| Bicarbonate | $\mathrm{mmol} / \mathrm{L}$ | <15 | - | If paediatric: notify all presentations |

| Analyte | Units | Low <br> Threshold | High <br> Threshold | Comments |
| :--- | :---: | :---: | :---: | :--- |

| Analyte | Units | Low <br> Threshold | High <br> Threshold | Comments |
| :---: | :---: | :---: | :---: | :---: |
| Creatinine | umol/L | - | DELTA <br> increase <br> >30\% <br> within 30 <br> days |  |
| C-reactive protein (CRP) | $\mathrm{mg} / \mathrm{L}$ | - | >10 | Significant only if <3 months old: notify first presentation |
|  |  | - | >200 |  |
| CSF glucose | $\mathrm{nmol} / \mathrm{L}$ | $\leq 1.5$ | - | Contact Microbiology scientist |
| CSF total protein | g/L | - | $\geq 2.0$ | Contact Microbiology scientist |
| Digoxin | ug/L | - | >2.0 |  |
| Gentamicin | $\mathrm{mg} / \mathrm{L}$ | - | >40 | First, post-dose value |
| Glomerular basement membrane antibodies (anti-GBM) | CU | - | $\geq 20$ |  |
| Glucose <br> (Random, fasting, or 0min GTT) | mmol/L | <2.5* | >25 | Critical result: notify immediately <br> ```*If an outpatient, notify <2.5 only if bicarbonate \(<18\)``` |
|  |  | - | 20-25 |  |
|  |  | - | >15 | Significant only if <1 month old |
| Haemoglobin (laboratory-run blood gases only) | g/L | $<70$ | - | Critical result (if laboratory performed): notify immediately |
|  |  | < 90 |  | Neonates Only (<28 days old) <br> Critical result (if laboratory performed): notify immediately |
| Iron | umol/L | - | >49 | Significant only if paediatric: notify all presentations |
| Lactate | $\mathrm{mmol} / \mathrm{L}$ | - | >4.0 | Critical result: notify immediately |
|  |  | - | 3.0-4.0 |  |

| Analyte | Units | Low <br> Threshold | High <br> Threshold | Comments |
| :--- | :---: | :---: | :---: | :--- |
| Lipase | $\mathrm{U} / \mathrm{L}$ | - | $>200$ |  |
| Lithium | $\mathrm{mmol} / \mathrm{L}$ | - | $>1.20$ |  |
| Magnesium |  | $<0.6$ | $>1.9$ | If paediatric: notify all presentations |
| Potassium |  | $<0.5$ | $>1.9$ | If pregnant and not taking MgSO ${ }_{4}$ |

| Analyte | Units | Low <br> Threshold | High <br> Threshold | Comments |
| :---: | :---: | :---: | :---: | :---: |
| Sodium | mmol/L | <125* | >155 | Critical result: notify immediately <br> *If paediatric, then refer below |
|  |  | <130 | >155 | Critical result if paediatric: notify immediately |
|  |  | $<127$ | >150 |  |
| T3, free | pmol/L | - | >10 |  |
| T4, free | pmol/L | - | >40 |  |
| Tacrolimus | ug/L | - | >30 |  |
| Triglycerides | $\mathrm{mmol} / \mathrm{L}$ | - | >10 |  |
| Troponin I |  | - | $\geq 20$ | Critical result if male outpatient: notify immediately |
| Beckman Coulter |  | - | $\geq 10$ | Critical result if female outpatient: notify immediately |
| Troponin I (Inpatient) <br> Beckman Coulter | ng/L | - | $\geq 20$ | If male |
|  |  | - | $\geq 10$ | If female |
| Troponin I (Outpatient) <br> Abbott | $\mathrm{ng} / \mathrm{L}$ | - | $\geq 26$ | Critical result if male outpatient: notify immediately |
|  |  | - | $\geq 17$ | Critical result if female outpatient: notify immediately |
| Troponin I <br> (Inpatient) <br> Abbott | ng/L |  | $\geq 26$ | If male |
|  |  |  | $\geq 17$ | If female |
| TSH | $\mathrm{mlU} / \mathrm{L}$ | - | >5 | If $\mathbf{3}$ weeks to $\mathbf{3}$ months old |
|  |  | - | >20 | If <3 weeks OR > 3 months old |
|  |  | - | >40 | Significant result (unless patient is pre-RAI scan) |

| Analyte | Units | Low <br> Threshold | High <br> Threshold | Comments |
| :--- | :--- | :---: | :---: | :--- |
| Tryptase | $\mathrm{ug} / \mathrm{L}$ | - | $\geq 11$ |  |
| Urea | $\mathrm{mmol} / \mathrm{L}$ | - | $>40$ | Significant result (unless inpatient or Dialysis <br> Centre patient) |
| Urate | $\mathrm{mmol} / \mathrm{L}$ | - | $>0.34$ | Significant only if pregnant |
| Urine TP:Cr ratio | $\mathrm{mg} / \mathrm{mmol}$ | - | $>50$ | Critical result only if pregnant: notify <br> immediately |
| Urine TP:Cr excretion | $\mathrm{g} / \mathrm{d}$ | - | $>0.5$ | Critical result only if pregnant: notify <br> immediately |
| Valproate | $\mathrm{mg} / \mathrm{L}$ | - | $>150$ |  |
| Vancomycin | $\mathrm{mg} / \mathrm{L}$ | - | $>40$ | If pre-dose value |
| Vitamin B12 | $\mathrm{pmol} / \mathrm{L}$ | $<80$ | - | Significant result (unless female $<50$, then see <br> below) |

## Haematology Alert Thresholds

| Analyte | Units | Low Alert <br> Threshold | High <br> Alert <br> Threshold | Other Alert <br> Thresholds | Comments |
| :--- | :---: | :---: | :---: | :---: | :--- |
| Haemoglobin | $\mathrm{g} / \mathrm{L}$ | $<70$ | - | - | CRITICAL: notify immediately |
|  |  | $<80$ | $>190$ | - | First presentation only |
|  |  | - | - | Fall of >30 |  |
|  |  | $<90$ | - | - | Paediatric patients only |

| Analyte | Units | Low Alert <br> Threshold | High <br> Threshold | Other Alert <br> Thresholds | Comments |
| :--- | :--- | :--- | :--- | :--- | :--- |
| White Cell count | $\times 10^{9} / \mathrm{L}$ | - | $>50$ | - | CR |

| Analyte | Units | Low Alert <br> Threshold | High <br> Alert <br> Threshold | Other Alert Thresholds | Comments |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Blood Films | N/A |  |  | (Acute promyelocytic leukaemia) |  |
|  |  | - | - | Malaria | CRITICAL: notify immediately |
|  |  | - | - | Massive haemolysis: incl. co-existence of fragments and thrombocytopenia | CRITICAL: notify immediately |
|  |  | - | - | New or relapsed acute leukemias |  |
| HITS screen | N/A | - | - | Positive |  |
| SVDK | N/A | - | - | All positive snake venom detection result |  |
| CSF Leukocyte | $\times 10^{6} / \mathrm{L}$ | - | >20 | - | Notify microbiology scientist |
| Blood Bank | N/A | - | - | A suspected issuing of incompatible blood product to a patient with the potential to lead to an acute haemolytic reaction. | CRITICAL: notify immediately |
|  |  | - | - | Discrepancy in blood grouping from previous result |  |
|  |  | - | - | Any significant delay in provision of blood products | Incl. red cell incompatibility due to atypical antibodies |
|  |  | - | - | Presence of an atypical antibody that may cause HDN in a pregnant woman | Unexpected result only |
|  |  | - | - | Positive DAT in a baby, or positive DAT in an adult where result is unexpected |  |

| Analyte | Units | Low Alert <br> Threshold | High <br> Alert <br> Threshold | Other Alert <br> Thresholds | Comments |
| :--- | :---: | :---: | :---: | :--- | :--- |
| Blood Bank | N/A | - | - | Kleihauer test $>3 \mathrm{~mL}$ <br> FMH |  |
|  |  | - | - | Antenatal antibody <br> titre $>1$ value <br> different from <br> previous |  |

## Microbiology Alert Thresholds

## Sterile site isolation:

Microscopic findings suggestive of infection and/or isolation of a pathogen from key sterile sites:

- Blood
- Fluids: CSF, peritoneal, ascitic, pericardial and pleural aspiration cultures (not drainage fluid), joint fluid
- Cardiac tissue/valve samples and prosthetic endovascular devices (e.g., vascular graft or pacemaker)
- Brain biopsy

Detection of a highly pathogenic organism from clinical samples (culture or antigen)
