

AFB Urine Collection

Patient Information

Your Doctor has asked you to collect 3 urine specimens for Pathology testing.

When you wake, urinate into a yellow topped container.

Screw lid tightly on container.

Write your full name, date of birth and the **time and date** of the collection on the container.

Follow this procedure for 3 consecutive days. A new, clean container must be used to collect urine each day.

Store the containers in the fridge.

Note: A minimum of 100 - 120mls per container is needed for this test.

When you have collected all 3 samples, take them, along with your request form, to an Austin Pathology Collection Centre.
