

# Cytology Urine Collection

## Patient Information

Your Doctor has asked you to collect 3 urine specimens for Pathology testing.

When you first wake, urinate **into the toilet**.

The next time you need to go to the toilet urinate into one of the clean yellow topped containers provided.

Screw lid tightly on container.

Write your full name, date of birth and the **time and date** of the collection on the container.

Follow this procedure for 3 consecutive days. A new, clean container must be used to collect a urine sample each day.

Store the containers in the fridge.

When finished your three day collection, take all the containers and your request form to an Austin Pathology Collection Centre.
