

Urine Collection for PCR

Your Doctor has asked you to collect a urine specimen for Pathology testing.

It is important to not urinate for 2 hours before collecting this specimen.

Urinate into the yellow-topped container.

Try to half fill the container.

Close the lid on the container tightly.

Write your full name, date of birth, and the time and date of the collection on the container.

When finished, take the container and your request form to an Austin Pathology Collection Centre.

Note: a minimum of 10mls of urine is required for this test.
