

**Your Doctor has asked you to collect 3 urine specimens for Pathology testing.**

When you wake up in the morning urinate into the container.

Screw the lid on the container and close tightly.

Use a new container and do this every morning for 3 days.

Write your full name, date of birth and the time and date of the collection on each container.

Store the containers in the fridge.

Note: A minimum of 50mls is needed for this test.

When you have collected all 3 samples, take them along with your request form to an Austin Pathology Collection Centre.
