

**Your Doctor has asked you to collect a faecal specimen for Pathology testing.**

Open the **brown topped container**.

Use the scoop to place a small amount of faeces in the container provided.

Close the lid tightly.

Write your name, date of birth, and date and time of the collection on the container.

Put the container in the specimen bag and close the bag securely. Place the bag in the freezer immediately.

Take the container and your request form to an Austin Pathology Collection Centre as soon as possible. Take care not to let the sample de-frost on the way.
