

Reducing Substances Faecal Collection

Patient Information

Your Doctor has asked you to collect a faecal specimen for Pathology testing.

Open **brown topped container**.

Use the lid scoop to place a small amount of faeces in the container provided.

Screw lid tightly on container.

Write your name, date of birth, and **date and time** of the collection on the container.

Put the container in the specimen bag and close the bag securely. Place the bag in the freezer immediately.

Transport the frozen container on ice, along with your request form, to an Austin Pathology Collection Centre as soon as possible. Do not let sample defrost on the way.
